

CRITICAL RISK MANAGEMENT

- Develop
- Implement
- Audit

OUR AIM

To assist SSE's in the development & implementation or the audit of their Critical Risk Management (CRM) program.

OUR APPROACH

Mineplex works with its clients to develop structured, practical and thorough CRM programs, focusing on what matters - preventing fatalities.

WHY CHOOSE US?

The CRM programs and audits are developed/conducted by an SSE with over 18 years of experience in the Queensland coal industry over numerous mine sites.

OUTCOMES

- Assist SSE's with communicating the WHY to all workers.
- Identify single and multiple fatality scenarios (Material Unwanted Events - MUEs) through a rigorous BBRA approach.
- Allocation of risk & control owners, control implementers and control monitors for each MUE.
- For each MUE:
 - Development of bowties.
 - Identification of critical controls.
 - Development of Critical Control Verification routines.

Do What Matters!!
